

Uretech PA1 Ultra - Future-Proof Compliance

Zero VOCs, solvents, phthalates, halogens and phosphates.

Dear Customer,

As part of a continued, industry wide push for products that meet BREEAM and LEED requirements, strict environmental legislation and are safe for the end-user, Star Uretech have developed Uretech PA1 Ultra pedestal adhesive. This is the only access flooring adhesive that is not classified as carcinogenic, contains zero VOCs, solvents, phthalates, halogens & phosphates and is listed on Google's portico healthy materials list. When constructing their London headquarters, Google wanted to source the safest and most environmentally friendly products available and this led to the development and use of Uretech PA1 Ultra.

As regulations regarding the safety of certain products develop, Star Uretech continues to innovate and lead the way for other adhesive suppliers. Uretech PA1 Ultra is already the UK's most used access flooring adhesive and its unique formulation ensures it is the only access flooring adhesive that ticks all of the boxes.
